Get help for a specific function:

Matlab	help sqrt
Torch	help(torch.sqrt)

Create a two dimensional tensor or matrix:

Matlab	[9, 6, 3, 4; 7, 2, 8, 1]
Torch	torch.Tensor({{9, 6, 3, 4}, {7, 2, 8, 1}})

Create a row vector:

Matlab	[9, 7, 6, 8] or [9 7 6 8]
Torch	torch.Tensor({{9, 7, 6, 8}})

Create a column vector:

	Matlab	[9; 7; 6; 8]
-	Γorch	torch.Tensor({{9}, {7}, {6}, {8}})

Create a one dimensional tensor:

Matlab	Matlab does not have one dimensional tensors. You can verify this by running ndims([9, 7, 6, 8]).
Torch	torch.Tensor({9, 7, 6, 8})

Short description here:

Matlab	Matlab code here
Torch	Torch code here
